

Project Overview

Development and deployment of Aha's website B2M (ecommerce platform). The project will be done in MVP(minimum viable product) format and later will be built up in further iteration. This document is concerned with the first iteration of the project. The technologies used in the project will be used in further iteration and if any changes are to be made, it should be under an agreement of both parties.

Goals

- Creation of bare minimum B2M platform
- Deployment of the project

Technologies

The project will be done using MDRN (MYSQL, Django, React, and Node). This iteration of the project will deal with the basic functionalities of an ecommerce website, which includes:

- CRUD of User(Retailers, Distributors, Manufacturer, and customer)
- CRUD of Products
- CRUD of Categories
- CRUD of Order
- Authentication System

Completion Date

The above project is to be completed by 2 months from the date of agreement, signed unanimously by both parties. Here in referred as Party 1 consisting of Samit Raj Mahat and Party 2 Consisting of Manish Kunwar, Prabal Bhandari & Nimesh Shakya.

Samit Raj Mahat

Manish Kunwar

Prabal Bhandari

Nimesh Shakya
